

# Fire and Emergency Response Training

## Emergency Procedure Development

Price based on facility inspection. Emergency Management Procedures for facilities based upon Australian Standard 3745-2010, Australian Standard 4083-2010 (Health Care Facilities) or Queensland Fire Regulations 2008.

Each set of procedures is individually developed to be site specific and includes setting up your Emergency Planning Committee and selection and training of the Emergency Control Organisation.

We can also provide and install A3 colour evacuation diagrams orientated to their location in the facility.

All procedures are developed in consultation with the facility occupants and include a practical evacuation.

Our team of writers are accredited writers of emergency management plans with Fire Prevention Association of Australia.
